SUMMARY

As a quality assurance engineer, I apply my creativity and technical skills to my development. I have strong troubleshooting skills, built up by a constant need to tinker and customize everything from modding games to making sure every detail of my Linux install is exactly how I want it. My varied work history has strengthened my interpersonal and customer service skills. I thrive on learning and self-improvement, and strive to be a valuable member to any team.

SKILLS

Ruby, Rails, Vue.js, HTML, CSS, JavaScript, PostgreSQL, Git, Github, Rest APIs, Test-Driven Development, Pair-Programming, Bootstrap, Cucumber, Testcafe, Object Oriented Programming

EXPERIENCE

Quality Assurance Engineer
Amount Inc   **July 2021 - Present, Chicago, IL**
· Developed and executed end-to-end tests, regression tests, and performance tests primarily in Testcafe.
· Subject matter expert on high data volume test scripting among QE team.
· Created comprehensive test plans based on business requirement documents and helped develop an efficient process for running tests on a large scale.
· Investigated, diagnosed, and reported defects, then verified fixes.
· Primary Account Opening QE point of contact for high priority client facing issues.
· Personally generated, manually tested, and automated 250+ testcases.
· Efficiently led a team of 4 through the entirety of the testing process for a new product, consistently completing goals by partner required dates in spite of tight deadlines.
· Designed and implemented division wide best practices to reduce interdepartmental confusion.

Shopify Developer
Ambient Dynamics   **April 2021 - May 2021, Los Angeles, CA**
· Created custom Shopify app matching client spec to achieve product launch needs.
· Leveraged ReactJS to create efficient and reusable components.
· Utilized Liquid to create a dynamic frontend element pulling data from the application.
· Learned new technologies including React, NodeJS, and multiple Shopify tools in a timely manner to ensure project completion by end of contract.
· Utilized Graphql using queries and mutations to manipulate Shopify product information and metafields.

Service Level 2
Sweetgreen   **May 2019 - July 2020, Santa Monica, CA**
· Learned to work in a fast-paced environment while maintaining positive customer experiences.

Executive Assistant
Fass Law and Music Management   **May 2016 - December 2016, Los Angeles, CA**
· Quickly and efficiently completed administrative day-to-day tasks.
· Maintained physical office filing system of legal documents for bands including The White Stripes, My Chemical Romance, and Rise Against.

PROJECTS

Capstone Project: "It's Over, Isn't It"
Actualize Coding Bootcamp · February 2021 - March 2021
· Developed a web app that allows users to find shows similar to ones they've previously enjoyed.
· It's Over, Isn't It is built with a Ruby on Rails backend and VueJS frontend with OMDB api integration.
· Enables users to navigate to the page of a show they enjoyed and make suggestions, rated on both enjoyability and similarity to the original show, with comment system including a brief description of what the users liked and didn't like in the suggested show.
· Implemented voting system to allow other users to rate suggestions.
· OMBD integration allows for new shows to be added to the database quickly and accurately as needed.
· Implemented an in-app watchlist to allow users to save suggestions, with optional Trello integration to sync saved shows to a Trello board.
· Live demo: itsover.netlify.app
· Frontend GitHub: github.com/ngencokamin/capstone_frontend
· Backend GitHub: github.com/ngencokamin/capstone_backend

CERTIFICATIONS

Web Development Certification
Actualize Coding Bootcamp · 2021
Learned fundamentals and best practices in full-stack web development in areas of project architecture, backend, frontend, and how to effectively self-teach new technologies
