

NIX GENCO-KAMIN

CHICAGO, IL 60640 • (323) 819-5144 • ngencokamin@gmail.com • ngencokamin.github.io

Highly motivated and result-oriented **Quality Assurance** professional with extensive experience delivering high-quality software products. Skilled in designing and executing efficient **test plans**, establishing **automation frameworks**, and **supervising** QA teams to ensure timely project completion. Proficient in programming languages, including **Python**, **Ruby**, **Bash**, and **JavaScript**, with an emphasis on enhancing testing efficiency & driving innovation. Proven ability to coordinate large and complex **testing environments**, evaluate large **datasets**, and implement **CI/CD workflows** to enhance software delivery. Known for performing in-depth **data analysis** to identify and resolve defects, as well as delivering exceptional user experiences through detailed testing and quality assurance.

PROFESSIONAL EXPERIENCE & TECHNICAL PROJECTS

TECHNICAL PROJECTS

batocera-switch – [GitHub](#)

01/2025 - PRESENT

Large-scale refactor of a legacy community script for enabling custom gaming platform support in the Batocera Linux distribution. Complete rewrite of Python and Shell logic for compatibility with latest Batocera builds, modularized configuration handling, ongoing rewrite of controller handling, updated installation and dependency handling, and improved usability and maintainability across devices.

Technologies: Python, Bash, Linux, System Automation, EmulationStation

PebbleNotes – [GitHub](#)

06/2024 - PRESENT

Fork and modernization of a Google Tasks app for Pebble smartwatches. Migrated legacy Python 2.7 App Engine codebase to Python 3.10, redesigned the auth backend, and replaced Travis CI with GitHub Actions using a custom Docker build pipeline.

Technologies: Python, Docker, Google App Engine, OAuth, GitHub Actions, JavaScript

pebble-docker – [GitHub](#)

04/2025

Docker image for the outdated Pebble SDK to simplify development and avoid Python/Node version conflicts. Used in active projects to support legacy smartwatch development.

Technologies: Docker, Linux, Node.js, Python 2.x

SH-IMESSAGE-SETUP - [GitHub](#)

02/2024 - 07/2024

SHELL SCRIPT TO FULLY AUTOMATE THE SETUP OF A SELF-HOSTED iMESSAGE MATRIX BRIDGE USING BLUEBUBBLES AND BEEPER BRIDGE MANAGER. SIMPLIFIES AND ORCHESTRATES A MULTI-STEP MACOS PROCESS INTO A GUIDED CLI WORKFLOW, WITH PERSISTENT SERVICE BEHAVIOR VIA CRON.

TECHNOLOGIES: BASH, CRON, MACOS CLI

MATRIX-NOTES-BOT - [GitHub](#)

01/2024

LIGHTWEIGHT PYTHON BOT FOR THE MATRIX MESSAGING PROTOCOL, ALLOWING USERS TO ADD, EDIT, AND TRIGGER PERSISTENT, REUSABLE MESSAGES WITHIN CHATROOMS. DESIGNED FOR SIMPLE DEPLOYMENT AND DYNAMIC IN-ROOM COMMAND HANDLING.

TECHNOLOGIES: PYTHON, MATRIX API

PROFESSIONAL EXPERIENCE

Amount Inc – Chicago, IL

07/2021 – 12/2023

Software Development Engineer in Test - Team Lead

- Developed custom **Ruby** scripts to generate/manage 30K+ mock customer datasets for **Guaranteed Rate** and **Barclays**, significantly boosting testing efficiency for both QA and development teams.
- Created full **Account Opening** test plans for **Capital One**, **Guaranteed Rate**, and **Barclays**.

- Developed full automated testing suites in **Python** with **Pytest-Selenium**, **JavaScript** and **Cucumber** with **Testcafe**, and **Ruby** with **RSpec**.
- Designed, documented, and automated 300+ test cases, integrating them into the team's test plans to improve coverage, prevent defects, and enhance user experience.
- Led a QA team of five through full testing lifecycle while ensuring high standards and on-time delivery.
- Created **Jenkins** pipelines for UAT and Prod deployments which prevented regressions and failed releases.
- Created and maintained decisioning smokesheets to enable unit tests validating decision engine accuracy for key customers.
- Served as the primary point of contact for **Capital One** Account Opening lifecycle.
- Led client meetings with **Guaranteed Rate** and **Barclays** as primary point of contact for all testing efforts.
- Overhauled company-wide **GitHub** Pull Request testing and review processes, improving workflow efficiency and enhancing code quality across teams.
- Created flexible, reusable **Python** templates for **SQL** queries within the **Pytest** framework, standardizing database validations and reducing test maintenance overhead.

Ambient Dynamics – Los Angeles, CA
Shopify Developer – Project Contract

03/2021 – 04/2023

- Created **Shopify** app to dynamically show order fulfillment status using **ReactJS**, **Liquid**, and **NodeJS**.

SKILLS

Software Testing: Cucumber, Testcafe, Selenium, Pytest, Cypress, Rspec, Test Case Writing, Test Planning

Software Development: Python, Ruby, Ruby on Rails, JavaScript, HTML, CSS, Vue.js, Liquid

Data: PostgreSQL, SQL, Excel, Jira, Confluence

Other: Git, GitHub, Rest APIs, Test-Driven Development, Pair-Programming, Bootstrap, Jenkins, Azure Cloud, Markdown
