Software Testing: Cucumber, Testcafe, Selenium, Pytest, Cypress, Test Case Writing, Test Planning

Software Development: Python, Ruby, Ruby on Rails, JavaScript, HTML, CSS, Vue.js, Liquid

Data: PostgreSQL, SQL, Excel, Jira, Confluence

Other: Git, GitHub, Rest APIs, Test-Driven Development, Pair-Programming, Bootstrap, Jenkins, Azure Cloud, Markdown

Certifications: Full-Stack Web Development, AZ-900: Azure Fundamentals

PROFESSIONAL EXPERIENCE & ACCOMPLISHMENTS

Amount Inc – Chicago, IL

07/2021 – 12/2023

Software Development Engineer in Test - Team Lead

- Developed custom **Ruby** scripts to generate and manage 30K+ mock customer datasets for **Guaranteed Rate** and **Barclays**, significantly boosting testing efficiency across manual and automated processes for both QA and development teams.
- Created full **Account Opening** test plans for **Capital One**, **Guaranteed Rate**, and **Barclays**.
- Developed full automated testing suites in **Python** with **Pytest-Selenium**, **Javascript** and **Cucumber** with **Testcafe**, and **Ruby** with **rspec**.
- Enhanced software quality and performance by designing, implementing, and automating over 300 test cases, resulting in the prevention of defects and enhancement of the user experience.
- Exhibited exceptional leadership by guiding a five-person team via the entire product testing lifecycle, balancing meeting partner needs and maintaining the highest quality standards, while still ensuring on-time delivery.
- Contributed to team success by training three new hires in advanced product and automation testing.
- Built and implemented **Jenkins** pipelines for automated code deployments to UAT environments, optimizing prod regression testing and effectively preventing deployment failures based on test results.
- Single-handedly responsible for the creation and maintenance of decisioning smokesheets for **Guaranteed Rate** and **Barclays**, enabling essential unit testing to confirm the precision and efficiency of the application's decision engine.
- Acted as primary point of contact for all things related to the Account Opening lifecycle for company efforts relating to **Capital One**.
- Led regular client meetings with **Guaranteed Rate** and **Barclays** as lead communication for all testing efforts.
- Implemented overhauled company-wide **GitHub** Pull Request testing and review processes, enhancing workflow efficiency and code quality.
